

Qont Product Capability Handbook

Qont exists to make risks make sense, solving what if, this handbook explains what the technology does for different users.

For Business and Commercial

Qont is Portable Risk Intelligence, it works on any device, anywhere, anytime, it lets teams take a photo, upload a document, paste text, or request a custom input, then it analyzes everything in seconds. It finds visible, hidden, and all risks, it shows a clear score and simple mitigations, you choose to apply a mitigation or not, and Qont then shows the updated risk after that choice. Businesses can use ready models for common needs, or ask for custom focus and inputs when needed, it turns mixed business data into clear risk scores and next steps, so decisions are steadier and faster. A team uploads a short report, adds two photos from a site visit, and pastes a summary, Qont analyzes everything in seconds and shows scores, the system lists the top risks and simple actions, the team applies one mitigation and sees the score improve, work stays on track, leadership reviews the updated score, they approve the move with confidence, the rollout proceeds.

For Individual

Qont is Portable Risk Intelligence for daily choices at work and at home, it lets you take a picture, upload a note, or type what you plan to do, then it analyzes in seconds. It shows a simple risk score you can understand, it suggests clear steps you can take now, you can follow the step or not, and Qont shows the updated risk after your choice, privacy is central, Qont does not store, sell, or misuse your data. It turns everyday questions into clear choices with a score and a simple path forward, a person plans a busy day, they upload a checklist and a photo of a task, Qont analyzes and shows where small risks may grow, they follow one suggested step, the score improves, the plan feels calm and clear, later they check again on their phone, the day stays steady.

For Government

Qont is Portable Risk Intelligence for public sector operations and services, it lets teams capture a scene, upload a form, paste a field note, or request a custom input, then it analyzes in seconds. It highlights visible, hidden, and all risks, it shows a score and practical mitigations in plain language, teams choose actions and see the updated risk after each step, services stay steady and safe, privacy is respected, Qont does not store, sell, or misuse data from people or agencies. It gives a clear picture of risk across people and operations and guides stable action in real time, a public team prepares an activity, they upload a brief, add photos from the site, and paste staff notes, Qont analyzes and flags gaps with scores, the team applies listed mitigations, staffing and timing improve, the risk score drops, on the day they check from phones and laptops, decisions are quick, the service runs smoothly.
